## Export Control & Research Cybersecurity Office

Ask RCRA June 12, 2025

## Why Export Control and Research Cybersecurity?

- Research related cybersecurity regulatory requirements.
  - DoD's DFARS 252.204-7012 clause
    - Adequate Security, Cyber Incident Reporting; Flow down Requirements; NIST SP 800-171
       Compliance
  - Cybersecurity Maturity Model Certification (CMMC)
    - Standardized framework developed by the DoD to protect sensitive unclassified information
    - Baseline requirements for storing, transmitting, accessing, or working with Federal Contract Information (FCI) or Controlled Unclassified Information (CUI).
  - NIH Genomic Data Sharing Policy
    - Institutional systems used to access or store covered data must be compliant with NIST SP 800-171
  - New FAR Rule implementing the Controlled Unclassified Information (CUI) program
    - We will likely see increased CUI designation in the near future
    - NIST 800-171 compliant systems

## **Next Steps**

- Develop programmatic components for new responsibilities related to Research Cybersecurity
  - Written Policies and Procedures
  - Compliance Oversight
  - Training and Education
  - Internal Monitoring
- Office Rebranding and Updated website to include information on CUI and research cybersecurity resources
