Research Security Reviews

Starting late last summer and early Fall of 2022, the Office of Research Compliance and Regulatory Affairs established a Research Security Program and formalized its research security reviews by starting to integrate risk assessments in various processes, such as recruiting new faculty, hosting foreign visiting scholars, and reviewing foreign entity disclosures made in eDisclose. Engaging in foreign travel and associations with foreign entities, such as independent consulting projects, board memberships, or involvement in scientific review committees, usually results in an awareness briefing about best practices and recommendations to safeguard research data while abroad. In some instances, a more in-depth risk assessment is needed.
