

SCHEDULE I AND II CONTROLLED SUBSTANCES: KNOW YOUR RESPONSIBILITIES

What are Controlled Substances Schedule I and II?

Schedule I

Substances with a high potential for abuse with no accepted medical use and a lack of accepted safety for use under medical supervision. Examples: marijuana, LSD, Ecstasy (MDMA), heroin.

Schedule II

Substances with a high potential for abuse, despite having an accepted medical use in the US. Examples: cocaine, opium, high grade morphine, oxycodone, methamphetamines.

Registrant Responsibilities

01 Registration

Before using these drugs in research, you must be currently registered with the Georgia Board of Pharmacy and the DEA.

02 Documentation

You must keep accurate records of the receipt, use and disposition of the drugs and complete inventories.

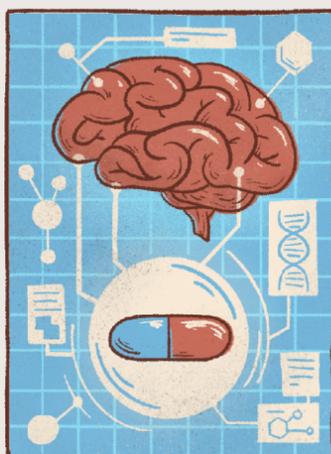

03 Control

Drugs must be stored in the approved GDNA/DEA location and the registrant should keep drugs locked and secured every day when not in use.

Why is this important?

01 Prevent Noncompliance

You are required to keep accurate records, including detailed use and disposition of the drugs. If not, you will be noncompliant with Emory University Policy 7.25, state and federal regulations.

02 Prevent Inappropriate Use

As a registrant, you are in charge and responsible to prevent diversion (inappropriate use) of the drugs. The best way to prevent misuse is to review your records and account for the drugs regularly.

03 Prevent fines and other consequences

You could receive fines and other consequences if you are not keeping accurate track of these drugs. Your license could be revoked and you may lose your ability to conduct research at Emory.

Lost, missing or stolen: Required Actions and Consequences

First, report it immediately!

Use the forms on our website to report it to ORIC/RCRA, Emory Police, EHSO, GDNA and DEA if the drug is a controlled substances. Be aware that the registrant is accountable for this report as the responsible party. If GDNA or DEA contact you for an inspection, contact us for additional help. **Prevent a diversion by keeping accurate records!**
