

Authorship Research Security Quick Reference eliminates confusion around where authorship-related information should be disclosed and ensures consistency across journals, sponsors, and institutional systems.

	Journals Manuscripts / Submissions	NIH Disclosures Other Support / Related Fields <i>Required</i>	NSF Disclosures Current & Pending / Related Fields <i>Required</i>	Institutional Disclosure System
Foreign Affiliations / Relationships	List relevant affiliations and acknowledge collaborating institutions as appropriate.	Foreign appointments, affiliations, or commitments; include in Biosketch (Appointments & Positions)	Foreign organizations, international appointments	Required disclosure of external/ foreign appointments or affiliations
In-Kind Support Space, equipment, personnel, data, etc.	Acknowledge material or resource contributions when required by journal	In-Kind Support provided outside awarded grant	In-Kind Contributions (Current or Pending)	Disclosure of external support or resources used in research
Data Access Foreign or external	Describe data sources and access consistent with journal policies	Access to data, materials, or resources provided by external entities	Activities involving data or resources from foreign organizations	Data use, sharing, or security disclosures as applicable
External Collaboration Signals Including foreign external professional roles	Disclose roles if required by journal conflict or authorship policies	Professional activities requiring commitment of time or resources	External activities or appointments	Outside activities, conflicts of interest/commitment disclosures
Visiting Appointments Paid or unpaid	Include affiliation if relevant to contribution or title	Visiting or secondary appointments	Current position(s), visiting or secondary roles	Disclosure of visiting, adjunct, or honorary roles

- Journals do not require sponsor disclosure forms, but information disclosed in manuscripts should not conflict with NIH, NSF, or institutional disclosures.
- When in doubt, ask early - Research security, sponsored programs, or compliance offices can help determine what belongs where before submission.
- This resource provides general guidance for authorship and publication disclosure reviews. Requirements may vary based on your institution, sponsor, and award or contract terms.
